

Trimble Infrastructure Connectivity Update

Compiled For: Trimble Infrastructure Users

Date: October 3, 2003

Subject Area: Third Party Hardware and Data Service

Status: The following items have been tested with Trimble's line of scaleable infrastructure products. No functional limitations have been detected to date when using Bluetooth. Serial cable connectivity has not been tested.

Sony Ericsson T610

Approx. Cost \$200.00

Data capable phone with full Bluetooth connectivity. May cost as little as \$100.00 with available rebates.

Sony Ericsson DRS-11 Data Cable

Approx. Cost \$30.00

Connects the phone to a nine pin serial port.

T-Mobile Internet Unlimited

Approx. Cost \$29.99

Unlimited monthly data usage plan. For coverage maps go to www.t-mobile.com/coverage. T-mobile uses a GSM network with a GPRS data service to achieve 2.5G data capabilities. Connecting phone number ***99#**. No user name or password is required to access the T-mobile data backbone.
